LONGCHAMP DALTON JAPAN LONG ONLY UCITS FUND

Share Class SUH (ISIN FR0013321957)

Sub-Fund of the LONGCHAMP SICAV managed by Longchamp Asset Management

OBJECTIVES AND INVESTMENT POLICY

The Longchamp Dalton Japan Long Only UCITS Fund (the “Sub-Fund”) is a UCITS Sub-fund. The Sub-Fund’s objective is to generate an annualized net performance higher than that of its benchmark over a recommended 5-year minimum holding period. The benchmark (the “Benchmark”) to which the Sub-Fund’s performance can be compared is the MSCI Daily Total Return Net Japan Index (symbol: MSDEJNN Index), compiled by MSCI Inc, which is a total return (dividends reinvested), free float-adjusted, capitalization-weighted index that is designed to track the performance of Japanese securities listed on the Tokyo Stock Exchange, Osaka Stock Exchange, JASDAQ and Nagoya Stock Exchange.

To achieve its objectives, Longchamp AM, as Investment Manager, has chosen to delegate the investment management to a Japanese Equity market specialist, Dalton Investments INC., based in Las Vegas Nevada, United States (the “Delegated Investment Manager”).

The investment strategy aims to mainly buy securities of companies that are domiciled in Japan, or that derive, or are expected to derive, a significant portion of their present and/or future revenue from Japan. The Sub-Fund focuses on identifying and investing in (a) “value” investments in securities that the Delegated Investment Manager believes are underpriced relative to their intrinsic value or fundamental value or which are expected to appreciate in value if circumstances change or an anticipated event occurs, (b) direct investments in operating and service businesses (not private equity investments, but investments in publicly traded companies in a minority stake) and (c) other investments in securities or instruments that Dalton believes are undervalued or likely to appreciate. The Sub-Fund invests its assets in equities with a primary exposure to the Japanese market, across sectors and industries as determined by the Delegated Investment Manager in its sole discretion. The Sub-Fund may invest in exchange traded funds (“ETFs”) subject to the overall limit on investments in collective investment schemes. The Sub-Fund will not take physical short positions. The maximum net long exposure of the Sub-Fund is limited to 100% of the Sub-Fund’s NAV.

Investments may include securities of companies with any market capitalization range but will be mainly focused on those of companies with a market capitalization in excess of USD 0.5 billion.

Alignment of interest between company management and shareholders, history of share buyback programs and dividend increases are important factors considered by the Delegated Investment Manager when assessing an opportunity.

Generally, the Sub-Fund will be exposed to the equity market. However, the Sub-Fund may, in case a devaluation of the equity market is anticipated, invest in money market and bond instruments of the OECD area, denominated in Yen. Selected securities may be invested in both public and private sectors. The sensitivity range to interest rate risk will range between 0 and 2. Securities will at least be rated Investment Grade.

The ratio of equity securities in the Sub-Fund will range from 0% to 100%.

The ratio of money market and bond instruments in the Sub-Fund will range from 0% to 100%.

The Delegated Investment Manager will be responsible for the allocation of equities as well as money market and bonds instruments.

This share class will be entirely exposed to currency risk.

The Delegated Investment Manager takes environmental, social and governance (ESG) criteria into account in investment decisions among others; however, sizing of individual positions is based on a larger scope of criteria than ESG only.
