LONGCHAMP DALTON INDIA UCITS FUND

Share Class SUH (ISIN FR0013423571)

Sub-Fund of the LONGCHAMP SICAV managed by Longchamp Asset Management

OBJECTIVES AND INVESTMENT POLICY

The Longchamp Dalton India UCITS Fund (the "Sub-Fund") is a UCITS fund. The Sub-Fund's objective is to generate an annualized net performance higher than that of its benchmark over a recommended 5-year minimum holding period. The benchmark (the "Benchmark") to which the Sub-Fund's performance can be compared is the MSCI India Net Total Return (MSCI India EUR, symbol: MOIN INDEX) compiled by MSCI Inc, which is a total return (dividends reinvested), free float-adjusted, capitalization-weighted index that is designed to track the performance of Indian securities listed on the Mumbai Stock Exchange.

To achieve its objectives, Longchamp AM, as Investment Manager, has chosen to delegate the investment management to an Indian Equity market specialist, Dalton Investments INC., based in Las Vegas Nevada, United States (the "Delegated Investment Manager").

The investment strategy aims to buy mainly securities of companies domiciled in India, or which realize, or should realize, a significant part of their present or future income in India. The Sub-Fund focuses on the identification and investment in (a) value securities that the Delegated Investment Manager believes are undervalued in relation to their intrinsic or fundamental values or whose value should appreciate if the circumstances were change or if a predicted event were to occur, (b) direct investments in operating and service companies (not investments in private equity, but in listed and floating companies) and (c) other investments in securities or instruments that the Managing Partner believes are undervalued or likely to appreciate.

The Sub-Fund invests its assets in equities with a primary exposure to the Indian market, across sectors and industries as determined by the Delegated Investment Manager in its sole discretion. The Sub-Fund may invest in exchange traded funds ("ETFs") subject to the overall limit of 10% net assets. The Sub-Fund will not take physical short positions. The maximum net long exposure of the Sub-Fund is limited to 100% of the Sub-Fund's NAV.

Investments may include securities of companies with any market capitalization range but will be mainly focused on those of companies with a market capitalization in excess of USD 0.5 billion or USD 1 million of average daily trading volume. Exposure to market capitalization of less than USD 1 billion will be limited to 20% of the net assets of the Sub-Fund.

Alignment of interest between company management and shareholders, history of share buyback programs and dividend increases are important factors considered by the Delegated Investment Manager when assessing an opportunity.

Generally, the Sub-Fund will be exposed to the equity market. However, the Sub-Fund may, in case a devaluation of the equity market is anticipated, invest in money market and bond instruments of the OECD area, take short positions on equities and implement currency hedging. Selected securities may be invested in both public and private sectors. The sensitivity range to interest rate risk will range between 0 and 2. Securities will at least be rated Investment Grade according to the Investment Manager analysis.

The ratio of equity securities in the Sub-Fund will be limited to 100% of the net assets and generally from 60% to 100%.

The ratio of money market and bond instruments in the Sub-Fund will range from 0% to 100%.

The Sub-Fund may also invest in ADRs (American Depositary Receipts), GDRs (Global Depositary Receipts) and P-NOTES up to 100% of net assets and convertible bonds up to 20% net assets.

The Delegated Investment Manager will be responsible for the allocation of equities as well as money market and bonds instruments.

This share will be entirely or partially exposed to currency risk.

The Delegated Investment Manager takes environmental, social and governance (ESG) criteria into account in investment decisions among others; however, sizing of individual positions is based on a larger scope of criteria than ESG only.
